Vol. 55
Ilers since the Civil War and Iler family residence records

Surnames: Iler

Morgan Her Genealogical Research Collection

Ilers since the Civil War

The birth and death records of Ilers who have lived and died in America over the past century.

Current Iler resident records.

Part I and II of the Iler Family Who's Who Series

Published by the Family News Network

The birth and death records

About the birth and death Index

This data was extracted from the Social Security Administration's Death Master file and includes information on people who were alive after Social Security was established in the mid 1930's. This spectrum dates back to folks who were born shortly after the Civil War (1864) who had not yet died as of mid 1930's - to people who were born later and died as recently as 1990. (The index was updated in September 1991.)

There would seem to be some inconsistancies for some family members who died before 1962. We speculate that before then the data was not machine readable. Thus when the index was created some information was omitted. Through a bit of calculations we have determined that the list is about 85% total for people who died after 1962.

We also have noted that after 1988, for reasons only known to the Social Security Administration, they started recording only the month and year of death - omitting the actual day. At the same time they also stopped recording the state of residence at the time of death

Based on the above analysis, searches will produce the best results for persons who were born after 1870, lived long enough to be included in the Social Security system, and died after 1962.

The residence records

About the residence records index

This information was extracted from various public domain sources including phone books, utility records, real estate records etc. We publish this data as the 1992 version. It was current at the time of publication. Searchers should take several factors into consideration.

We are a very mobile and, alas, mortal population. Your new telephone book is already 10% obsolete by the time it reaches your doorstep. To those households listed at an old address, we apologize.

Further confusion may occur in listing a widower in the late husbands name. This is because many widowers keep their public listing in their late husbands name.

Finally, some of you may not be listed at all. This is because we use a double check that results in our not publishing listings that show conflicting information. We eliminate a lot of false information this way however we usually catch up a bit of true information in the sweep.

588 (LINES) LISTINGS

The Iler Family Historical, Genealogical, and Current Event Database.

This publication contains information extracted from the Iler Family Genealogical, Historical and Current Event database. This database is part of a larger collection, the Family News Network database - which includes all surnames.

To date we have input, and sorted by surname, all U.S. residency records, the Social Security Master Death File, assorted marriage, military and census records. Also over a quarter of a million newspaper articles that reference different surnames. The database grows daily as more and more information becomes electronically available.

The database has the capacity to digitize and store old photos, tape recordings, even videos. This results in information of a more lively nature then may be found in conventional genealogical databases.

Additional publication for the Iler Family will be available soon. **In the meanwhile we urge all family members to mail in anything you may have.** Group sheets, old photos, newspaper articles, anything you have that may be of interest to a fellow Iler.
